VOXter®

Robust speech-client!

The VOXter® is a state-of-the-art speech-client, "Made in Germany". This device has been specifically developed for use in the rough warehouse environment and is a reliable partner for mobile data capture with voice. The technical components of the VOXter® conform to industry standards.

The shock- and impact-proof face cover assures the functionality of the VOXter® during the daily working routine.

Because of its compact design the VOXter® is easy and comfortable to wear without any restrictions to the operator's mobility.

The VOXter® has been optimized for use with voice applications, where the focus is on a smooth workflow and no distraction to the operator. Therefore a cover display has been deliberately excluded.

Product profile:

Integrated wireless:
Wi-Fi (802.11b/g), Bluetooth

Radio security:
Security standard 802.11i (WPA2), downward compatible to WEP / WPA

Operating system:
Windows CE 5.0

Processor:
Intel XSCALE PXA 270 (624 Mhz)

Operating temperature:
-30°C to 50°C / -22°F to 122°F

Power:
removable 4.800 mAh lithium-ion battery

Operating time:
up to 14 hours

Indicators:
LED for status and charging

Audio:
Optimized for use with voice / topTALK-Technology / 9-pole connector

Product:
VOXter® incl. charger, spare battery, power supply unit, manual

Accessory units:
Charger for spare battery

Heavy-duty headset connector

The VOXter® is optimally designed, down to the last detail with its high-performance and robust components, and meets the high requirements demanded by daily working routines. For that reason the VOXter® has been equipped with an industrial-strength, 9-pole plug-in connection with push-pull-interlock connector which can be inserted and extracted quickly and easily while ensuring a stable connection to the headset. This same connection is also used in the medical sector, by the military, and German police.

Ergonomic, compact design

The VOXter® is very compact, robust, and well-designed to meet the daily challenges of rough warehouse routines. Neither dust nor dirt, humidity or heat can harm the VOXter®. Even an accidental drop onto concrete will not damage the device.

User-friendly control panel

The design of the VOXter® is very user-friendly with a flat surface keyboard and a dirt-resistant protective cover. Its buttons are recessed to prevent any accidental keyboard entry. The VOXter® can safely be worn underneath a coat or jacket, even when picking in deep freeze conditions and wearing gloves.

Run-time of up to 14 hours

The VOXter® runs on a powerful exchangeable battery with a battery life of up to 14 hours. If necessary, multiple-shift use is possible without power problems.

Standard system software

Like all our products, the VOXter® is based on industry standards, and runs on Windows CE 5.0 by Microsoft. For that reason, the VOXter® can be easily integrated and supported into existing IT infrastructures. The connection of additional devices, such as the barcode scanner VOXter®-Scan, is also possible via Bluetooth technology.

Rent-a-VOXter®

The VOXter® is available as a rental as a convenient option during peak seasons. Please contact our office directly for more information.

Accessories

VOXter® WL-1006 additional rechargable battery (4800 mAh)
1-01-001-021

VOXter® WL-1006 charger for additional battery, single slot
