Voxter® Elite Edition

New Standards for Mobile Voice Computers.

Optimized for use with Lydia®

topsystem
VOICE SOLUTIONS

The Reliable Partner for Mobile Data Entry by Voice.

Voxter® Elite Edition is setting new standards for mobile voice computers. It is smaller, more robust and more efficient than the first-generation mobile voice computers and thus the perfect partner for all voice-operated processes in logistics, production and maintenance.

The Voxter® Elite Edition is compact, lightweight and comfortable to wear. Its robust housing guarantees prompt and reliable voice recognition in almost any work environment, even under extreme conditions.

In combination with its revolutionary design, featuring only one button - the 'on / off' switch - it is incredibly simple and convenient to use. All other functions such as volume and speed are controlled by voice, giving new meaning to the term 'Voice Terminal'!

Product Profile

Dimensions / Weight:
approx. 102 mm x 67 mm x 46 mm / 4"x 2.5" x 1.7"
approx. 255 g / 9 oz incl. belt clip and battery

WLAN:
In compliance with IEEE 802.11a/b/g

Bluetooth:
V2.1 + EDR

Wireless security:
Safety standard WPA, WPA PSK, WPA2, WPA2 PSK, TKIP, AES, IEEE 802.1x authentification, TLS, PEAP

System software:
Windows CE 6.0

Processor:
Marvell XScale Prozessor PXA 166 (800 Mhz)

Memory:
256MB RAM, 512MB Flash, 1GB Micro SD-Card Industrial

Operating temperature:
-30°C up to +50°C / -22°F up to +113°F

Battery:
Quick-change battery 5.200 mAh Li-Ion

Operating time:
Up to 14 hours, 24/7

Protection class:
IP67

Illuminated display:
3 two-colored LEDs for status indication

Audio:
Optimized for mobile voice data entry, topTALK technology, 9-pole plug connector with push+pull lock and quick disconnect

Miscellaneous:
Position sensor for optimal power management

Smaller

Water-proof

Tougher

Smarter

Voice-controlled

Easier to use

Dust-proof

Smaller, faster, better – and “Made in Germany”.

Comfortable to wear

The Voxter® Elite Edition, clipped to a belt, is so small and light that it is hardly noticed by the user. Yet its compact design and robust housing is ideal for day-to-day operations. Neither dust, dirt, moisture, frost nor heat will stand in the way of the Voxter® Elite Edition. It can even survive a drop on a concrete floor.

Extremely robust – down to the last detail

The Voxter® Elite Edition, with its efficient and extremely durable components is build to withstand all the rigors and operating environments of today’s continuously changing logistics businesses.
The headset connector in particular has to endure constant wear and tear. For that reason, the Voxter® is equippped with an industry-standard 9-pole plug connector with a push+pull lock which enables a quick and easy connect and disconnect and, at the same time, provides a stable connection to the headset.

Intuitive voice operability

The Voxter® Elite Edition was developed especially for mobile voice data entry and – needless to say, the device is also operated by voice. Apart from switching the device on and off, all service commands are integrated in the voice software suite Lydia®.
Starting with the voice login, all instructions within the application are controlled by voice, such as volume, speed or muting the microphone. The Voxter® Elite Edition can therefore be operated without the user having to actually touch it. Especially when working in refrigerated or frozen environments or whenever gloves have to be worn this feature is of great advantage.

Battery life of up to 14 hours

High-performance rechargeable batteries with an operational life of up to 14 hours are available for Voxter® multi-shift operations. Working hours of up to 24 hours / 7 days a week are easily handled with a simple battery exchange.

New:
Movement sensor for optimal power management. If the device is not in use it will automatically enter sleep mode.

Bluetooth

If necessary, other equipment can be connected via Bluetooth – e.g. Voxter® Scan Elite Edition, Voxter® RFID or Bluetooth Headset Lydia® BlueMaster.

Rent-a-Voxter®
You can also rent a Voxter®, e.g. during peak seasons or when using temporary personnel. Please contact us for additional information.
